JOB DESCRIPTION: Senior Frontend Architect / Lead

COMPANY OVERVIEW & ROLE SUMMARY

Company: CloudScale AI Technologies | Location: San Francisco, CA (Hybrid / Remote)

Role: Senior Frontend Architect / Lead Engineer

We are seeking an experienced Frontend Architect to design and scale our enterprise React web application, lead code reviews, and establish frontend testing standards.

KEY RESPONSIBILITIES

- Architect, develop, and maintain performant web applications using React 18, TypeScript, and Next.js.
- Manage complex state with Redux Toolkit and optimize frontend data caching with GraphQL.
- Implement modern responsive UI components using Tailwind CSS.
- Maintain comprehensive unit and integration testing pipelines with Jest and Cypress (min 85% coverage).
- Manage deployment workflows and CDN asset distribution using AWS CloudFront and GitHub Actions.

REQUIRED TECHNICAL QUALIFICATIONS

- 5+ years building scalable single-page applications with React and TypeScript.
- Proven experience with Redux Toolkit, Next.js (App Router), and Tailwind CSS.
- Hands-on proficiency with Jest or Vitest for automated testing.
- Experience integrating GraphQL queries and mutations.
- Familiarity with AWS CloudFront CDN distribution and modern cloud infrastructure.
